Freelance Consultant { Austin, TX - Virtual }  
<http://www.heysulli.com>  
9/1/2006 – Present  
Developer/Design/Architect/Consultant

I have been working with rich media, design work, web services, database work, ecommerce sites and all things internet related. My focus now is on how to improve existing sites and design new sites utilizing service based architectures.

Web development (HTML, CSS, javascript, jQuery, SQL, C#, Umbraco)  
Flash work (Actionscript 2 & 3), design work  
Adobe Photoshop and Illustrator work  
Client site maintenance

Access1 Media { Ft. Worth, TX - Virtual }  
<http://www.access1media.com>  
9/1/2010 - 11/1/2012  
Lead Developer/Design/Technical Architect

Developed and designed an AIR Application for the displaying of Flash based content modules. The application provided the content modules with access to web services allowing the digital signage running the software the ability to communicate with external services for the purposes of data collection, customer messaging and social media. The AIR Application also allowed the content application to make decisions on how to present the content based on the majority gender of the viewing audience.

Core Application (Adobe AIR)  
Content packages (Adobe Flash)  
Integration with 3rd party facial recognition API  
Website and services platform  
Database design and development  
Project architecture, design and oversight

Commemorative Brands { Austin, TX }

<http://www.balfour.com>

9/17/2003 - 7/1/2006

Web Technologist

Primary job responsibilities included html, css, C#, SQL, XML, XSL, VB, and some Access work.

Web development C#, HTML, CSS

Adobe Flash projects

SQL database work

XML/XSL

Access work

Highlights:

Created a simple XML based content management system for the display of several college brochure style sites, which was eventually tied to a product configuration tool for online purchase of college rings online. The site's ease of use allowed a marketing team to take over maintenance and creation of all new sites reducing workload on the development team. Built an Access interface for a SQL based project information/management database.

Dell { Round Rock, TX }

<http://www.dell.com>

11/1/1999 - 9/17/2002
